

Accounting: Using commonsku +

When you connect with Xero you combine the powerful CRM and order-management systems of commonsku with Xero's online accounting package giving you a complete view of your orders from project idea to paid invoice and everything in-between.

How commonsku's integration with Xero works:

STEP 1: Your business goes live with commonsku 🎉

Our Customer Success team will reach out to begin scheduling your training, answer any questions you have about commonsku's features, and help you connect your Xero account.

STEP 2: Activate your Xero account

Your Xero representative will help you with the initial set up of your account, along with importing your chart of accounts and setting your tax rates.

STEP 3: Map your bills, invoices and taxes

Bill, Invoice, and tax mapping tells commonsku what Xero account to export to for each respective item.

STEP 3: That's it! You're all set ✅

Looking for more in depth information on setting up Xero with commonsku?

Xero has all you need to run your accounting - including invoicing, sales tax returns, reporting, and more. Xero is easy to use online accounting software that's designed specifically for small businesses.

What makes commonsku and Xero such a powerful combo?

- Eliminate double entry of clients and vendors: New clients and vendors entered in commonsku automatically populate in Xero.
- Focus on sales not data entry: All bills and invoices created in commonsku move over to Xero seamlessly, freeing up your time to focus more on your clients needs.
- All in the cloud: combining commonsku and Xero allows you to work from anywhere on any device.
- It's online so you can work when and where you want to. Log in with your PC, Mac or mobile device.
- Your bank statements are automatically imported and categorized, letting you see your cashflow in real-time.
- Invite your team members to work together on financials. You can collaborate over your up-to-date numbers.
